

PROFITABLE FARMING WITH KOUDIJS BROILER CONCENTRATES

Koudijs Broiler Concentrates offer the highest revenue based on feed efficiency and meat quality. These easy-to-use feed concentrates provide all the essential nutrients for excellent performance.

In addition, they are continuously optimised for the conditions in your region so you always have the right concentrate available. This revenue-focused approach enables us to work successfully with broiler farmers all over the world.

WHY CHOOSE KOUDIJS BROILER CONCENTRATES?

Feed expert

- Koudijs is part of Royal De Heus, a global leader in animal feed production. As such, we bring expertise and a revenue-focused approach to your farm. Supported by our dedicated team and advanced laboratories and research farms, we ensure the best results.

Feed efficiency

- We provide just what your birds need based on their nutritional requirements. That's our secret. Koudijs concentrates support intestinal health, vitality, and high feed efficiency. They also use early growth, muscle composition and feed conversion progress to get excellent results.

High-quality products

- All Koudijs concentrates are produced according to HACCP and ISO standards. We closely check critical control points to deliver predictable results.

Low feed conversion rate

- Great results start with feed and animal management. Our approach to feed creates growth capacity, supports intestinal health, improves efficiency and produces better quality meat.

Revenue-focused

- Growth efficiency is highest in young birds. So our feeds are focused on meat production, giving you the most efficient growth and highest-quality broilers by adjusting the mixing to the life stage of your animals.

Increasing capacity

- Better growth not only increases your income per bird, but also the amount of meat you produce per square metre.

More joy

- More revenue, convenience and vitality along with fewer problems

ONE-BAG SOLUTION

Our concentrates focus on early development and increased growth capacity. As a result, you get the most benefit from the period when growth efficiency is at its highest. Our approach increases survival rates and feed efficiency and reduces the amount of feed you use per kilogram of growth. Our concentrates include all essential additives, nutrients, amino acids, enzymes and other micro-ingredients. There's no need to add any other ingredients to your feed. That's why Koudijs is called the convenient one-bag solution.

To optimise growth, the composition of feed needs to be adjusted according to the development of the birds:

- Koudijs Pre starter Galdus 0-7 days
- Starter feed 7-14 days
- Grower feed 15-28 days
- Finisher feed 28- slaughter

PRESTARTER GALDUS

Galdus Pre starter is a premium micro pellet for your broiler chicks. Galdus stimulates:

- Early feed intake
- Carcass development
- Immunity development
- Regulation of intestinal microflora
- Development of the digestive tract
- Higher survival rates
