

# PROFITABLE FARMING WITH KOUDIJS DAIRY CONCENTRATES

Using Koudijs Dairy Concentrates gives you the highest revenue based on feed efficiency and milk quality. These easy-to-use feed concentrates include all the essential nutrients for excellent performance and persistent milk production.

They are also continuously optimised for the conditions in your region so you get the most benefit. This revenue-focused approach enables us to work successfully with dairy farmers all-over the world.

## WHY CHOOSE KOUDIJS DAIRY CONCENTRATES?

### Feed expert

- Koudijs is part of Royal De Heus, a global leader in animal feed production. As such, we bring expertise and a revenue-focused approach to your farm. Supported by our dedicated team and advanced laboratories and research farms, we ensure the best results.

### Feed efficiency

- Creating a balanced diet with the right nutrients, including sufficient micro-elements, vitamins and enzymes, is the secret to feed efficiency.

### High-quality products

- All Koudijs concentrates are produced according to HACCP and ISO standards. We closely check critical control points to deliver predictable results.

### Increased milk production

- Our feeds focus on milk production. Milk consists of fat, protein, sugars and minerals. To achieve the highest production we match the nutritional requirements of the cow.

### Health and persistent milk production

- Great results start with feed and farm management. Our approach to feed focuses on better fertility, fewer health problems and more milk produced per kilogramme of feed due to an optimised diet.

### More joy

- More revenue, convenience and vitality along with fewer problems, tasty milk and satisfied customers. That's what you want for your farm.

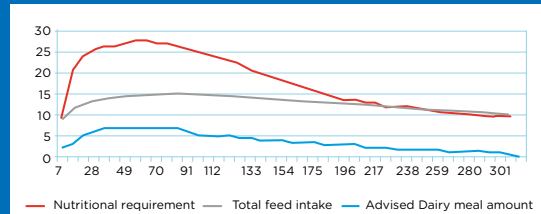

## ONE-BAG SOLUTION

Dairy meal is not fed to dairy cows regularly and is often used to replace roughage. Dairy meal has sufficient protein and energy to optimise rumen function and balance the required energy and protein. A lactation-based feeding schedule that meets the requirements of your cows ensures you get the highest yield per kilogram of dairy meal. The lack of energy (negative energy balance) is highest when feed intake versus production is lowest. Lactation-based feeding gives you higher yields, healthier cows, better fertility and more persistent milk production.

## TOGETHER FOR BETTER RESULTS

Koudijs 969005 Dairy Lick Blocks provide essential minerals to give your dairy cows a nutritional boost. They also support rumen function to improve digestion.

To support you, Koudijs has made a range of Farm-Up videos about essential aspects of dairy management. Scan the QR code to watch these videos. Ask your Koudijs representative to select the best Koudijs solution for you.

## KOUDIJS DAIRY MEAL FEEDING TABLE

Days in lactation	Cow weight 350 kg	Cow weight 450 kg	Cow weight 550 kg
0	1,50	2,00	2,50
7	4,00	6,00	6,50
28	5,00	7,00	7,50
49	5,00	7,00	8,00
70	5,00	7,00	8,00
91	4,50	6,50	7,50
112	4,00	6,00	7,00
133	4,00	5,50	6,50
154	3,50	5,00	6,00
175	3,00	4,50	5,50
196	3,50	4,00	5,00
217	3,00	3,50	4,50
238	2,50	3,00	4,00
259	2,00	2,50	3,50
280	1,50	2,00	2,50
301	1,00	1,00	1,50
