

PROFITABLE FARMING WITH KOUDIJS PIG CONCENTRATES

Good feed, good management and good breeds give you the best revenue from your pigs. Feed is a big part of the cost of producing pig meat. That's why Koudijs focuses on feed efficiency. Our easy-to-use feed concentrates provide all the essential nutrients for excellent performance.

In addition, they are continuously adjusted to the conditions in your region so you always have the right concentrate available. We optimise them based on the requirements of the animal along with the price and availability of raw materials. This revenue-focused approach enables us to work successfully with pig farmers all over the world.

WHY CHOOSE KOUDIJS PIG CONCENTRATES?

Feed expert

- Koudijs is part of Royal De Heus, a global leader in animal feed production. As such, we bring expertise and a revenue-focused approach to your farm. Supported by our dedicated team and advanced laboratories and research farms, we ensure the best results.

Feed efficiency

- We provide just what your pigs need based on their nutritional requirements. That's our secret. Koudijs concentrates support intestinal health, vitality, and high feed efficiency. They also use early growth, muscle composition and feed conversion progress to get excellent results.

High-quality concentrates

- All Koudijs concentrates are produced according to HACCP and ISO standards. We closely check critical control points to deliver predictable results.

Revenue-focused

- At Koudijs we want our customers to achieve the highest revenue. Our mixings always suit the life stage of your pigs. At the same time, our feed range is based on consistent high performance, high survival rates and better vitality. This gives you more piglets per sow and high efficiency in the grow-out period. High performance like this means competitive pig farming.

Mixing options

You can choose from three mixing types to meet your specific production goals:

- Economical mixings focus on obtaining the lowest feed price per kilogram of complete feed.
- Optimal mixings focus on obtaining the best profit. With these mixings, you create a complete feed for excellent performance and income.
- Performance mixings focus on making a complete feed to obtain the highest performance.

More joy

- More revenue, convenience and vitality along with fewer problems, and satisfied customers. That's what you want for your farm.

ONE-BAG SOLUTION

Our concentrates are based on the requirements of your pigs and tailored to their various stages of development. By analysing the quality of raw materials and their price, we provide the best and most profitable mixings. Our concentrates include all essential additives, nutrients, amino acids, enzymes and other micro-ingredients. There's no need to add any other additives to your feed. These mixings meet all the requirements of your pigs to give you high performance.

Available concentrates for piggery:

- Koudijs Nurse Meal
- Koudijs Creep Feed Concentrates
- Koudijs Pig Concentrates

CREEP FEED

Creep feed maintains the condition of your sow which enables her to have more piglets per year. Creep feed also stimulates intestinal development of the piglets, ensuring vital growth and a good start before and after weaning.

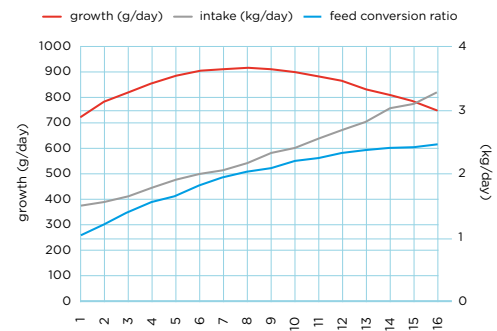

Feed your piglets during the suckling period with creep feed in a separate area.
